

Nurturing diversity in an **early years** setting

Professional Development for Early Years Educators

How can a teddy bear teach empathy, engage collaborative learning and nurture cultural competence?

The experienced educators at the *Global Learning Centre* know how much you value your staff and how important it is to provide them with rich and meaningful professional learning opportunities. We also know that you want your centre to provide a wealth of enriching experiences for the children who come to your centre each day.

With amazing resources and a team of dedicated education professionals, the *GLC* has a host of irresistibly engaging, hands-on workshops specifically tailored to meet the needs of your staff.

Popular workshops include:

Through the eyes of a teddy bear: Nurturing cultural competence

Reading the world: Global literature and multicultural resources in the early years

The world came to my place today: Developing young global citizens

All workshops align with the *Early Years Learning Framework (EYLF)* and the *National Quality Standards*.
